

CERTIFICATE OF COMPLETION

# Full Software Lifecycle & Vulnerability Management with AI Agents

*AI-Assisted DevSecOps Workshop · Bynet Data Communications*

This certificate confirms completion of the AI-Assisted DevSecOps Workshop, in which the participant designed and deployed a complete software delivery lifecycle using industry-leading tools and AI agents.

The holder used Script.it AI agent to autonomously build and deploy a full CI/CD pipeline from source code to a live production environment, and GitLab Duo AI agent to identify, explain, and remediate a critical SAST vulnerability.
